Clover Flex

IT'S EVERYTHING YOU NEED ON ONE, SIMPLE DEVICE.

Small in size, Clover Flex is built to do business wherever you are. Easy to take with you and easy to hand to customers- they can dip, swipe, tap, enter a pin and sign, whether in line, in the aisle, or at the table. And its built-in receipt printer and scanner ensures Clover Flex delivers the ultimate in flexibility.

THE ULTIMATE IN FLEXIBILITY
The Clover Flex helps you do business where your customers are. It's ultra-portable, so it's perfect for checking out in the aisle, at the table and at the counter.

ACCEPTS ALL PAYMENTS
Clover Flex accepts credit, debit, EMV chip cards, NFC payments, Apple Pay, Google Pay, gift cards and cash. Plus, we track your sales in real time and provide detailed reports on device, on the web and on our mobile iOS/Android App.

SCALES AS YOU GROW
As your business grows, Clover Flex grows with you. From inventory to employee and customer management, you can run a full POS from the same compact device that takes your payments.

CHECKOUT WHERE YOU ARE. NOT WHERE YOUR COUNTER IS.
No need to run back and forth from your customer to your counter to process a card, print the receipt, get the customer signature, and adjust the tip. Just do it right there with Clover Flex.

SIGNATURES ON THE SPOT
Clover Flex accepts electronic signatures, and emails and texts receipts. And we store everything for you - so no more piles of paper receipts, which makes things a lot easier in the event of a chargeback.

MANAGE YOUR INVENTORY
Far from your standard POS system, Clover Flex features a built in camera and barcode scanner, so you can scan items into inventory instantly.

STAY CONNECTED
Wireless 3G capability lets you take payments anywhere on the road—or use WiFi closer to home.

UP WHEN YOU'RE DOWN
Take payments even when your connection is down. Clover will run the payments as soon as you're back online.

PLAYS WELL WITH OTHERS
Clover Flex works seamlessly with other Clover hardware, so you can take orders in line or at the table, and close them at the counter on another Clover device.

TouchCash ATM POS
